

Allen and Page were the first horse feed company to receive Vegetarian Society approval for their whole range and led the way on only using Non GM ingredients. As a manufacturer they are also constantly aware of their impact on the environment and their responsibility to produce feeds in the greenest way possible. Allen & Page are genuinely striving to improve equine nutrition and educate owners. They are not just here to sell feed; it is all about doing the right thing – ethically, nutritionally and environmentally.

	<p>FAST FIBRE Suitable for all horses and ponies. Takes just 30 – 60 seconds to soak. Very high fibre, low starch, low sugar. Fast Fibre is also barley and molasses free and is ideal for the good doer or for horses who tend to be hyper even on low energy feeds. Fast Fibre is also particularly useful for horses with dental problems as it can be used as a partial or complete hay replacer if necessary. Also suitable for horses and ponies prone to laminitis. Fast Fibre has a unique recipe which enables it to soak in under a minute, so you can be sure that your horse's feed is always fresh.</p>
	<p>RIDE AND RELAX Barley, molasses and alfalfa free. Low starch and high fibre. Ride & Relax is a light, muesli mix for horses at rest or in light to medium work. Suitable for horses with an intolerance to barley, molasses or alfalfa. Ideal for horses which tend to get excited even on low energy mixes. Fortified with Omega 3 and 6 oils for better all-round health and fantastic skin and coat condition. Ride & Relax is an excellent source of slow-release energy for all types of horses and ponies. Ride & Relax contains prebiotics and Protexin to help maintain the balance of friendly bacteria in the gut and guard against digestive upsets.</p>
	<p>SLIM & HEALTH For horses that tend to be overweight, and good doers. Everything your horse needs, but without the calories. This low-calorie mix is low in starch and high in fibre, and is suitable for horses at rest or in light work which don't need much feed to keep weight on. It provides all the nutrients needed for optimum health and fantastic coat condition including Omega 3 and 6 oils. Boosted vitamin and mineral levels, Protexin and yeast all work to help keep your horse healthy, without putting on excess weight.</p>
	<p>HACKING MIX More than a low energy mix but not over the top. A medium energy muesli mix, with real mint and garlic. Includes Protexin and prebiotics for a healthy balance of gut flora. Not just for hacking! With higher levels of oil and fibre and low starch. Hacking Mix is the ideal choice for active leisure horses or novice competition horses, perhaps doing 1-1.5 hours a day, regular hacking, schooling or competing at riding club level. Hacking Mix is also useful for youngsters who no longer need a specific youngstock feed but do require a balanced diet with enough protein and energy for growth and condition.</p>

	<p>POWER AND PERFORMANCE</p> <p>Barley, molasses and alfalfa free, high energy performance feed.</p> <p>In trials, Power & Performance has been Allen & Page's most successful feed ever. Tested by top riders, the unique blend of energy sources has consistently improved focus and results.</p> <p>Power & Performance is a revolutionary, new, high energy, low starch performance feed. For many years the performance horse has relied on high starch, cereal packed diets to provide them with the energy levels required for hard work. Power & Performance is a completely new approach to performance nutrition. Being free from barley and molasses Power & Performance is low in sugar and starch and provides the horse with a unique blend of high quality energy allowing horses to work hard, achieve results and perform to the best of their ability while remaining focussed and in control.</p>
	<p>CALM & CONDITION</p> <p>For Topline Without The Barley</p> <p>The barley-free feed for horses and ponies who need to put on condition, while staying calm.</p> <p>Ideal for horses or ponies that “hot-up” on normal conditioning feeds. Protexin helps maintain a healthy digestive system.</p> <p>Formulated without barley or oats, Calm & Condition is a pelleted feed for horses who need to put on condition, but remain calm. It is suitable for horses with a true barley intolerance. Low in starch and high in fibre, a careful high-oil balance of linseed and soya oil helps to produce fantastic skin and coat condition.</p>
	<p>OLD FAITHFUL</p> <p>Pellet free and easy to chew – also extremely palatable.</p> <p>Protexin and prebiotics may help maintain the balance of beneficial bacteria in your horse’s gut.</p> <p>Old Faithful’s Special Blend provides easily digestible sources to maintain condition, as well as high quality protein. For use at whatever age your horse starts to “drop off” condition and not look as well as he used to – for some this may be 14 years of age, but for others it may be at 22 years! A blend of linseed and soya oil helps to maintain healthy joints and can assist skin and coat condition, and this mix is designed to be appetising for the fussy feeder. Herbs work in synergy with other ingredients to provide an extremely effective feed for maintaining weight and condition. For horses that struggle with hay or haylage, Fast Fibre can also be fed to boost older horses fibre intake.</p>

L-MIX

for Those Prone To Laminitis

Low starch, low calorie, high fibre.

No added sugars, molasses or cereals.

'L' Mix may be fed to horses and ponies on box rest or light work. The inclusion of long fibre in the form of alfalfa and chaff (both low in fructans) ensures more chewing time, which is beneficial for horses or ponies on a restricted diet, helping to maintain a healthy digestive system. Quality vegetable proteins and unsaturated oils help provide essential nutrients while yeast provides a rich natural source of vitamins and minerals. A unique blend of premium grade herbs, specifically for healthy hooves, work in synergy with other ingredients.

SUGAR INTOL

Free From All Cereal & Added Sugar

No added, sugars, molasses or cereals.

High in fibre, low in starch – suitable for horses that are resting or in light/medium work.

Suitable for horses or ponies that are prone to Laminitis (but not overweight) or Cushing's Syndrome.

Sugar & Cereal Intolerance Diet includes long fibre (unmolassed alfalfa and oat straw chaff), a small amount of micronised peas, linseed, several herbs and yeast to provide a rich natural source of vitamins. The inclusion of Protexin may help to maintain healthy digestive and immune systems. Being high in fibre and low in starch, this feed is also suitable for horses or ponies which are prone to Laminitis, when more energy or condition is required than can be provided by 'L' Mix.
