

SPILLERS® created the original compound horse feed in the UK in the 1950's. Since that time SPILLERS® have led the way in innovative nutritional products. From some of the world's best known horses, to the family pony, SPILLERS® horse feeds have been the choice of generations.

	<p><b>SPILLERS HORSE &amp; PONY CUBES</b></p> <ul style="list-style-type: none"> <li>• SPILLERS® Horse and Pony Cubes are the original and the best non-heating* cube, low in cereal starch.</li> <li>• Like SPILLERS® Cool Mix™, they are ideal for horses and ponies with low to medium energy requirements</li> <li>• The formulation now benefits from the addition of magnesium, known for its calming properties</li> <li>• Also contains an excellent vitamin and mineral formulation support package for long-term well-being</li> </ul>
	<p><b>SPILLERS COOL MIX</b></p> <ul style="list-style-type: none"> <li>• Ideal for horses and ponies with low energy requirements.</li> <li>• The formulation now benefits from the addition of magnesium, known for its calming properties</li> <li>• Controlled levels of cereal starch and added soya oil to help keep your horse in excellent condition.</li> <li>• Contains NovaMin-S®, a unique formulation of vitamins, minerals and antioxidants for health you can see.</li> </ul> <p>* A non-heating feed is one that is less likely to produce excitable behaviour in some horses and ponies when fed at the recommended rate.</p>
	<p><b>ORIGINAL BALANCER</b></p> <ul style="list-style-type: none"> <li>• Whole cereal free, low starch non-heating* formulation</li> <li>• Contains excellent protein sources rich in essential amino acids to support muscle tone and topline.</li> <li>• Formulated with live probiotic yeast to support digestive health.</li> <li>• Contains a comprehensive range of vitamins and minerals to balance the diet and provide optimum nutrition</li> <li>• Glucosamine is included to support joint health</li> <li>• Contains magnesium known for its calming properties</li> <li>• Contains a blend of nutrients to support hoof health including biotin, methionine, calcium, organic zinc and copper</li> <li>• Added soya oil for a healthy coat and skin</li> <li>• Contains vitamin C for respiratory support</li> <li>• High in important antioxidants such as vitamin E, vitamin C and organic selenium for immune support</li> </ul> <p>* A non-heating feed is one that is less likely to produce excitable behaviour in some horses and ponies when fed at the recommended rate.</p>

For more information on any of our range, please call Mike or Chris on 01844 355800 or visit our store at Manor Farm, Chinnor Hill, Oxon. OX39 4BG.

#### LITE BALANCER

Contains excellent protein sources rich in essential amino acids often lacking in restricted rations for overweight horses and ponies.

- Formulated with live probiotic yeast to support digestive health.
- Contains a comprehensive range of vitamins and minerals to balance the diet and provide optimum nutrition
- Contains magnesium known for its calming properties
- Contains a blend of nutrients to support hoof health including biotin, methionine, calcium, organic zinc and copper
- Added soya oil for a healthy coat and skin
- High in important antioxidants such as vitamin E, vitamin C and organic selenium for immune support

#### SENIOR BALANCER

- Whole cereal free, low starch non-heating\* formulation
- Contains excellent protein sources rich in essential amino acids to support muscle tone and topline.
- Formulated with live probiotic yeast and MOS (mannan oligosaccharide) to support digestive health.
- Contains a comprehensive range of vitamins and minerals to balance the diet and provide optimum nutrition
- Glucosamine is included to support joint health
- Contains magnesium known for its calming properties
- Contains a blend of nutrients to support hoof health including biotin, methionine, calcium, organic zinc and copper
- Added soya oil for a healthy coat and skin
- Contains vitamin C for to support respiratory health
- High in important antioxidants such as vitamin E, vitamin C and organic selenium for immune support
- High levels of B vitamins to compensate for decreased production in the hind gut due to decreased digestive efficiency
- Increased levels of phosphorus to support reduced absorption in the older horse

For more information on any of our range, please call Mike or Chris on 01844 355800 or visit our store at Manor Farm, Chinnor Hill, Oxon. OX39 4BG.

#### PERFORMANCE BALANCER

- Contains excellent protein sources rich in essential amino acids to support muscle tone, repair and topline.
- Formulated with live probiotic yeast and MOS (mannan oligosaccharide) to support digestive health.
- Includes an enhanced comprehensive range of vitamins and minerals to balance the diet and provide optimum nutrition
- Glucosamine is included to support joint health
- Contains magnesium known for its calming properties
- A blend of nutrients to support hoof health including biotin, methionine, calcium, organic zinc and copper
- Added soya oil for a healthy coat and skin
- Contains vitamin C to support respiratory health
- High in important antioxidants such as vitamin E, vitamin C and organic selenium for immune support
- contains generous levels of B vitamins to support energy release
- Includes a comprehensive range of B vitamins and organic copper and iron to support optimum blood building
- Optimum levels of calcium, phosphorus, organic copper and zinc and magnesium to support bone strength

#### SPILLERS INSTANT MIX

SPILLERS RESPONSE® Instant Energy Mix is ideal for laid back horses needing extra presence and sparkle

- Higher in cooked cereals but still contain a good proportion of high digestible fibre compared to most other traditional competition feeds.
- The energy sources within these feeds support muscle and digestive system health.

#### SPILLERS SLOW RELEASE CUBES

- Higher in high digestible fibre and oil.
- The energy sources within these feeds support muscle and digestive system health.

SPILLERS RESPONSE® Slow Release Energy Mix and Cubes are almost identical in their formulation, but we recognise some horses and ponies have a preference for either cubes or mix so we have made both forms available.

For more information on any of our range, please call Mike or Chris on 01844 355800 or visit our store at Manor Farm, Chinnor Hill, Oxon. OX39 4BG.

#### SPILLERS SENIOR COND MIX

SPILLERS® Senior Conditioning Mix is a highly effective conditioner which exactly meets the nutritional needs of the senior horse requiring extra calories to help build and maintain condition and topline.

- Ideal for active senior horses
- Ideal for those in retirement that have difficulty in holding weight or for those that drop weight in the winter
- Contains easily digested steam flaked cereals and soya oil for conditioning power, on a base of highly digestible fibre
- Small size particles for easy chewing by horses with poor teeth

#### Benefits of both SPILLERS® Senior Feeds

- **Joint Support**  
Glucosamine hydrochloride is included to help support joint mobility. Just 2kg of SPILLERS® Senior feeds supplies 4g per day of glucosamine hydrochloride, equivalent to that supplied by some joint supplements.
- **Quality Protein**  
An excellent amino acid profile is included to support muscle tone and topline.
- **Chelated Minerals**  
Selenium, manganese, copper and zinc are chelated for better absorption and to support hoof health.
- **Digestive Support**  
Live yeast is included to support fibre digestion in the hind gut and to help maintain gut health.
- **Antioxidants**  
A high level of Vitamin E and chelated selenium are included to help support the immune system and maintain a healthy antioxidant status.
- **B vitamins**  
Fully fortified with B vitamins, as production in the gut may be impaired.
- **Soya Oil**  
For coat condition
