

USING VERM-X - FOR POULTRY, DUCKS AND FOWL

Available in Pellets and Liquid form. Feed half the amount to birds between 2-4 months and feed the full adult amount at 4 months old.

Pellets

Add 2.5g per bird per day as a top dressing to their regular feed ration. Repeat for three consecutive days each and every month or as required. A 2.5g scoop is enclosed in each re-sealable pack. A useful calendar reminder is also included.

Pellet sizes: 250g and 750g tubes, 1.5kg tubs

Liquid

Add 1.5ml (graduated measuring cup with every bottle) per bird to approximately 50ml per bird of drinking water or soaked in bread. Repeat for three consecutive days each and every month or as required. Disallow other drinking water if placing in a water source until all the Verm-X water is drunk.

Liquid sizes: 250ml, 500ml,

Verm-X Liquid is fed by adding the measured amount to your bird's drinking water for three consecutive days each month throughout the year and disallowing any other drinking water for the 3 days per month you add Verm-X. A further advantage of Verm-X over chemical based products is that if you are growing your birds for your dinner table there is no withdrawal period after using Verm-X prior to eating. Each bottle is supplied with a measuring cup.

Verm-X Pellets for Poultry, Ducks and Fowl are 2mm in diameter and mix well into regular manufactured feeds or home made feeds. Produced under licence by Gro-Well Feeds Limited in Wiltshire brings over 35 years' of feed production experience. All ingredients are natural and non-GM and the pellets are produced in one of the UK's only low temperature pelleting facilities to avoid damaging the ingredients during production.

Being a 100% natural herbal formula there is no egg withdrawal period. Verm-X is easy to use by adding to your bird's feed for three consecutive days each month.

Verm-X for Poultry, Ducks and Fowl is packed in sizes including sensible amounts for the small flock owner. We have many valued clients with flocks of 3 or 4 hens or just one friendly duck. Being 100% natural, Verm-X has the added advantage of having no egg withdrawal period.
